

ACCESSORIES

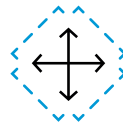

THE HEIGHT-ADJUSTABLE TABLE

The height-adjustable work table is engineered for **ergonomic and comfortable operation** with laser welding machines. Designed to enhance productivity and precision, it is ideal for **any working environment**, ensuring optimal performance during welding tasks.

HEIGHT-ADJUSTABLE

With motorized height adjustment, the table enables safe and comfortable operation. Its adaptability to various height settings makes it ideal for extended use with laser welders, ensuring maximum operator comfort throughout long working sessions.

FLEXIBILITY

The height-adjustable table is engineered for dual-configuration use, providing versatility and optimizing efficiency by adapting seamlessly to different work environments and operational demands.

FUNCTIONAL DESIGN

The height-adjustable table combines functionality and style with a carefully engineered design. Made from high-quality materials, it ensures durability and a sleek, modern look, making it perfect for any workspace, from labs to production settings.

Dimensions

The motorized table is available in two configurations:

Configuration A: 70 x 85 cm

Configuration B: 85 x 70 cm

FEATURES

MADE IN ITALY

Flexibility of use

With its two configurations (70 × 85 cm and 85 × 70 cm), the height-adjustable table easily adapts to different spatial and operational requirements.

Ergonomics

The height-adjustable table provides excellent ergonomics thanks to its motorized legs, which can be adjusted from 72 cm to 118 cm. This feature allows for effortless height adjustment to the optimal working position, enhancing the comfort and posture of the operator.

User-friendly

Thanks to the convenient buttons, the height-adjustable table can be easily raised and lowered, enabling quick adjustments to accommodate the operator's needs.

Stability

Designed to support loads of up to 120 kg, it ensures stability and long-lasting durability.

COMPATIBLE WITH

MIDI TECH

Reliable and user-friendly entry-level laser welder, ideal for small-scale operations and repairs in the jewelry and dental sectors.

EVO WHITE

Welder for small jewelry and dental laboratories, ideal for repairs and customizations, ensuring precision and reduced working cycles.

EVO X

Compact and powerful, it ensures maximum precision on reflective metals, delivering excellent performance and reliability.

EVO X TECH

A leader in performance and efficiency, featuring an optimized duty cycle and a soft spot for uniform and clean welds on all metals.
